You're very welcome. Whatever we can do to help. Totally agree on the cementing in of the bench. Maybe I'll even try to be there to have on-site approval or something. We will see how it works out. Take care.

HI Dave, thanks for the email. Please proceed. Iv got no problem with them replacing it with something similar. The only thing I see they need to do is to make sure they get it cemented into the ground the same as the other bench to prevent them from falling over form vandals or the wind. Thanks For the Help!! I'm hanging in there, but I could not do it without your help and the rest of OSM. Thanks A bunch.

Hey Juan. Following up on my prior email about the missing bench in Ocean Trails Reserve. I know you guys are probably swamped, so I'm thinking of a way to take this issue off your plate. I spoke with So Kim in CD and she says there is no designated design criteria for that missing bench. We can have Trump National install something appropriate even if it is not an exact match. I was looking through a Barco Products catalogue and I'm sure I can find a specific model bench or two that I can suggest they purchase and install. If you agree, I'll proceed with them accordingly. If you disagree or want to proceed in a different manner, please let me know. Have a great weekend. ---Dave

Hey Juan. I hope your week is starting out well. Say, you can see by the attached photos I sent to the maintenance representative at Trump National Golf Course, Lili Amini, the vandalized bench near the Southshore Coastal Trailhead in the Ocean Trails Reserve. It is Trump National's task to replace that bench and it seems they are willing to do so which is good. Lili emailed back that they are wondering where to get that same type of bench, whether we had any in stock or what catalogue they could order one from.

I sent an inquiry to So Kim in Community Development (she handles contacts with Trump National) asking if she knew of any bench style requirements for Ocean Trails. I am awaiting her response. I don't think there are any.

What would be the best resource for Trump Nat. to get a bench you think? I'm sure we in Rec & Parks can review some park catalogues to order one, but I thought I'd ask you first if you have a preference on how to proceed.

Subject: Southshore Coastal Trailhead missing bench

Hi Lili. I hope you are well today. Say, we had to remove a vandalized bench that someone had removed from its spot at the Southshore Coastal Trailhead. They poised it on the edge of the cliff, so we had to tow it back and dismantle it to get it out of there. It was unusable as you can see on one of the attached photos at it is lying on the ground.

Another photo shows the vacant spot where a new bench needs to go back in. It can be similar to the other remaining bench that is currently nearby on the other side of the picnic table. The attached aerial photo shows the location of the vandalized

bench (to the right of the blue triangle) prior to it being damaged. Would you folks be able to handle this replacement sometime soon? This is a primary visitor overlook spot and should have all the original number of benches in place. Let me know at your convenience how you plan to proceed. Thank you. ---Dave
